

Mountainview Animal Hospital

The Bottom Line

Dr. Swift's first name 'Nacy' is not only a very pretty name, but it has a story behind it. Nacy is actually a family name that has been passed down through many generations.

Her great great grandfather adopted a boy named Jim Nacy who became a famous priest in Detroit. The name Nacy then became her grandfather's and her father's middle name.

Dr. Swift likes listening to country music and watching the television shows American Idol and 24.

Gryphon was named after the University of Guelph's Football team the 'Guelph Gryphons'.

ANNOUNCING A NEW ADDITION TO OUR TEAM

Happy New Year to everyone; we hope it has started off well. Ours has begun with an exciting new change. After a lot of thought and discussion we have decided to take that next step and add a second veterinarian to our team. As many of you have noticed, we have enjoyed a tremendous growth in the number of clients over the past few years. Largely our popularity in the community has to be credited to you, our clients. Your generous praise and referrals has helped our vision come true. However, as we have grown it has become increasingly difficult to keep up with and continue to provide that great service you have become accustomed to. As a result we began our search to find that wonderful veterinarian to help us maintain our high standard of quality medicine, surgery and patient care; and now we have found her.

Doctor Nancy Swift graduated from the Ontario Veterinary College/University of Guelph with honours in the spring of 2003. After graduation she was employed as a full time veterinarian in Brampton, actually in the same clinic Dr. Ewing used to work. In March of 2005 she had a baby boy, Luke. After her maternity leave she went back to full time practice in Cheltenham. Dr. Swift has two dogs, a Labrador named Gryphon and a mixed breed named Lucky. She also has a 15 year old cat named Lilly. She enjoys hiking, watching movies and spending time with her family and friends.

We are excited to have Dr. Swift join us; we believe she is a perfect addition to our team. We hope that she will have the same wonderful experience that we have had in this community and develop similar relationships with our clients. Dr. Swift will be working a full day on Mondays and Thursdays, Wednesday mornings and every other Friday afternoon. Having Dr. Swift with us will allow us to offer appointments on Monday and Thursday mornings when we previously could not because Dr. Ewing was in surgery; and on Wednesday mornings Dr. Swift will be performing surgery.

Over the years, some clients have expressed some concern that as we grow, they feared we would lose the personal touch and doctor continuity they have come to expect. As always, we have heard those concerns and have taken them into account. If you wish to see a particular doctor with your pet, please ask for her when booking your appointment and we will do our best to accommodate your request. And of course, Dr. Ewing and Dr. Swift will be communicating and sharing their thoughts about all our patients so as to make everyone's care seamless.

We hope you join us in welcoming Dr. Swift to Mountainview Animal Hospital and Dr. Swift looks forward to meeting you and your furry (or feathery) friends.
